

Alex Morgan

Senior Software Engineer · Distributed Systems & Platform Infrastructure

San Francisco, CA · alex@example.com · github.com/connectors-testing-pplx · linkedin.com/in/alexmorgan

SUMMARY

Senior software engineer with 9+ years building distributed systems, developer tooling, and platform infrastructure that scales to tens of millions of users. Specializes in cell-based architectures, streaming ingestion, and observability. Leads with empathy for the next maintainer and a measure-first, ship-often philosophy.

EXPERIENCE

Staff Software Engineer — Platform Infrastructure

2022 — Present

Nimbus Cloud Systems

Led the platform team owning service deployment, autoscaling, and the internal developer portal. Drove a migration to cell-based architecture that cut blast-radius incidents by 70% and reduced p99 latency by 38%.

Senior Software Engineer — Distributed Systems

2019 — 2022

Helio Analytics

Designed the streaming ingestion pipeline powering real-time dashboards for 2,000+ enterprise customers. Built a backpressure-aware event router handling 1.2M events/sec at peak with exactly-once semantics.

Software Engineer — Backend Services

2017 — 2019

Beacon Labs

Built core billing and identity services from the ground up. Introduced the team's first structured observability stack, dropping mean-time-to-detect from 45 minutes to under 4.

SKILLS

Languages:

Go, Rust, Python, Kotlin, TypeScript, SQL

Infrastructure:

Kubernetes, Terraform, AWS, GCP, cell architecture, service mesh

Data & Streaming:

Kafka, Apache Flink, PostgreSQL, ClickHouse, Redis, distributed queues

Practices:

Distributed systems design, observability, SRE & on-call, technical leadership, mentorship

SELECTED PROJECTS

Cellbus

Open-source library for routing traffic across cell-based deployments with automatic failover and weighted load distribution. 3.4k GitHub stars.

Telemetry Garden

Self-hostable observability dashboard unifying metrics, logs, and traces behind a single query language.

Scalecheck

Load-testing harness that replays production traffic shapes against staging to catch capacity regressions.

EDUCATION & CERTIFICATIONS

B.S. in Computer Science — University of Washington, Seattle

Graduated with honors

Focus on distributed systems and operating systems.

Certifications: AWS Solutions Architect (Professional) · CKA · HashiCorp Terraform Associate
